Cement, Concrete, and Aggregates
Table of Contents
Volume 14, 1992

No. 1, Summer

Toughness Behavior of Fiber-Reinforced Rapid-Set Materials: A Preliminary Study—A. SAMER EZELDIN AND P. N. BALAGURU 3
Properties of High-Strength Concrete Containing Light-, Normal-, and Heavyweight Aggregate—A. ULRIK NILSEN AND PIERRE-CLAUDE AÏTCIN 8
Evaluation of Granulated Blast Furnace Slag as a Cementitious Admixture—A Case Study—JERRY W. HAMLING AND RICHARD W. KRINER 13
Task Force Report on ASTM D 2419: Sand Equivalent Value of Soils and Fine Aggregate, Prepared for ASTM Subcommittee D 04.51—PETER MALPHURS, ROBERT N. DOTY, AND V. KIRK TATUM 21
Properties of Zeolite as an Air-Entraining Agent in Cellular Concrete—FENG NAIQIAN 41
Development of a New Method for the Determination of Iron Content of Hydraulic Cementitious Materials and Pozzolans—RUDOLF E. RICHTER AND TOY S. POOLE 50
Sludge Ash Pellets as Coarse Aggregates in Concrete—JAVED I. BHATTY, ABE MALISCI, IWAO IWASAKI, AND KENNETH J. REID 55
Technical Note: Are Small Aggregates Really Better for Making High-Strength Concrete?—FRANCOIS DE LARRARD AND ALBERT BELLOC 62
Technical Note: Static Modulus of Elasticity of High-Strength Concrete from Pulse Velocity Tests—A. ULRIK NILSEN AND PIERRE-CLAUDE AÏTCIN 64
Testing Forum 67
Book Reviews 69

No. 2, Winter

Masonry Properties as Influenced by Mortars—VAL S. DUBOVOY AND JACOB W. RIBAR 71
Thermal Properties of Concrete from Transient Conduction of a Thin Slab—SIEW-ANN TAN, BOON-HWEE LOW, AND TIEN-FANG FWA 78
The Effects of Igneous Aggregate Sources with Various Los Angeles Abrasion Test Values on the Strengths of Concrete Mixtures—SERJI N. AMIRKHANIAN, ERVIN L. DUKATZ, JR., DOUGLAS KACZMAREK, AND DARRELL BROWNLOW 86
Natural Zeolite for Preventing Expansion Due to Alkali-Aggregate Reaction—FENG NAIQIAN, MA CHANGCHEN, AND JI XIHUANG 93
Factors Affecting Use of Calcium Chloride in Concrete—HOMER B. LACKEY 97
A New, Simple, Rapid, and Reliable Method for Determining Sulfur Trioxide and Phosphorous Pentoxide in Portland Cement and Classes C and F Fly Ash—SAFWAT W. BISHARA 101
Influence of Specimen Size as Compressive Strength and Elastic Modulus of High-Performance Concrete—WALID BAALBAKI, MOUSSA BAALBAKI, BRAHIM BENMOKRANE, AND P. C. AÏTCIN 113
Precision Statement for ASTM C 457 Practice for Microscopical Determination of the Air-Void Content and Other Parameters of the Air-Void System in Hardened Concrete—RICHARD PLEAU AND MICHAL PIGEON 118
Technical Note: Compressive Strengths of Hydraulic Cements Produced in the United States—RAYMOND M. KOLOS 127
Testing Forum 131
Book Review 132
